Macromedia Flash plug-in version 7

### Business Dashboards Connected To Live Data

You've invested the time, money, and staff into establishing a solid business intelligence (BI) system that provides critical business data. Your challenge now is how to identify emerging trends, spot opportunities, and uncover potential problems – then distribute the information using an easily understood form.

Crystal Xcelsius™ Workgroup is the solution you've been looking for.

With Crystal Xcelsius Workgroup, you easily create and connect business dashboards to virtually any existing enterprise or business data source. This means no matter what your company's current data source, you quickly provide interactive, custom business dashboards – in days, not months.

*Deliver up-to-the-minute business data in interactive and insightful dashboards*

### How It Works

Crystal Xcelsius Workgroup provides everything you need to create business dashboards connected to any company data source, and share them live via Microsoft Office, SharePoint, Adobe PDF, and the web. Flexible data access using SOAP-based web services, XML, and other connectors ensures your business dashboards are populated with up-to-the-minute information.

*Connect to any external data source.*

*Create interactive business dashboards with point-and-click.*

*Share your dashboards with up-to-the-minute data on portals, the web, or even within Microsoft Office and Adobe PDF documents.*

## Benefits

Crystal Xcelsius Workgroup is the new standard in interactive business dashboards – and the only software to give you these benefits:

- **Interactive visual modeling.** Crystal Xcelsius Workgroup has visual modeling, enabling you to develop forward-looking business dashboards and scorecards that let executives plan ahead. The dashboards enable executives to identify critical data relationships, probe elaborate what-if scenarios, and peer into your company's possible future performance.
- **Easy distribution of business dashboards to your workgroup.** Unlock the power of information to others on your team. With Crystal Xcelsius Workgroup, you can easily distribute live dashboards and visual business models in Microsoft PowerPoint, Word, Outlook, and Adobe PDF so users have easy access to live data to gain deeper insight.
- **Business Dashboards connected to personal or corporate data.** Crystal Xcelsius Workgroup lets you create interactive business dashboards from personal or corporate data with point-and-click ease. Flexible data access through SOAP-based web service, XML, Microsoft Reporting Services, and other connectors means your visual business dashboards are current.

Best of all, Crystal Xcelsius Workgroup is designed with the end-user in mind. You achieve rapid development and deployment with a template-driven architecture and easy Excel-based foundation – meeting your organization's need for interactive dashboards and scorecards, quickly.

## Features

**Point-and-click ease.** Crystal Xcelsius Workgroup's intuitive interface includes prebuilt components, skins, maps, charts, and one-click export – making it easy for nontechnical users to develop fully interactive business dashboards.

**Stunning presentation.** Custom graphics and interactivity allow you to develop and present compelling yet easy-to-understand financial dashboards and business summaries for the Web, intranets, and portals – any environment that supports Macromedia Flash.

**Visual modeling.** Sliders, gauges, filters, numerical input tools, and other visual components let decision-makers quickly evaluate multiple what-if scenarios in real-time, with the click of a mouse right on the dashboard.

**Live data connectivity.** Crystal Xcelsius Workgroup business dashboards connect to your company's existing BI system, XML-compliant databases, and SOAP-based Web services – ensuring up-to-the-minute information, whenever and wherever you view it.

**Stunning visualization for Microsoft SharePoint.** Crystal Xcelsius out-of-the box integration with SharePoint enables companies to provide their SharePoint end-users with interactive animated charts, graphs, and dashboards – reporting capabilities that previously were not possible using the SharePoint Portal Server.

**Connectivity to Microsoft SQL Server Reporting Services.** Crystal Xcelsius Workgroup provides point-and-click connectivity to Microsoft Reporting Services reports, giving you a competitive advantage by delivering vital business data in secure, insightful, and interactive business dashboards.

**Rapid deployment.** An intuitive interface and point-and-click connectivity to your enterprise data enable you to develop and deploy sophisticated dashboards in days instead of months.

**Low development cost.** Crystal Xcelsius Workgroup's template-driven and flexible architecture eliminates the costly systems engineering traditional dashboard solutions require.

**Language Support.** Crystal Xcelsius Workgroup is available in Dutch, English, French, German, Italian, Japanese, Spanish, Simplified Chinese, Traditional Chinese, and Korean.
